Panel on Information Technology and Broadcasting
The Legislative Council of the HKSAR

Dear Sirs,

Re : Support Establishment of Innovation and Technology Bureau

Innovation and technology are the keys to sustainable and diversified economic development, and are essential in enhancing Hong Kong's competitiveness as a knowledge-based economy, as well as improving people's livelihood and benefiting our society as whole. Establishing the new Bureau will not only help promote local research & development, but will also bring about more career opportunities to our next generation.

Setting up the Innovation and Technology Bureau is a golden opportunity to strengthen Hong Kong's competitive edge. We believe we should grasp the opportunity and therefore, we strongly support the establishment of Innovation and Technology Bureau and urge LegCo members to discard their intention to filibuster, allowing the Government's proposal to pass.

Very truly yours,

Ir Victor Ng
Chairman
Hong Kong Electronics & Technologies Association
