Subject: Comments about the Unified ICT Professional Recognition Framework

Date: May 9, 2014

1. The qualification schemes of unified ICT professional recognition framework should be reviewed periodically, in order to catch up the pace of the nowadays IT environment.
2. We are strongly agreed that the enforceable code of ethics and conduct are important for ICT practitioners, which should be one of the core values of unified ICT professional recognition framework.
3. The Secretariat can provide a verification service for employers to check the credentials of ICT practitioners and service providers.
4. The unified ICT professional recognition framework definitely will help universities or IVE students entering the job market, which will also help to create the critical mass.
