Outstanding issue	Administration's Response
1. Extension of control under the	The Administration presented a paper on proposed amendments of the Public health
Public Health (Animals and Birds)	(Animals and Birds) Ordinance, Cap. 139 in the July 2001 Panel meeting. We
(Chemical Residues) Regulation to	explained, inter alia, that –
fish	• the ambit of the Public Health (Animals and Birds) Ordinance, Cap. 139 at
	present did not cover fish; and
	• we would seek to extend the ambit of the Ordinance to cover fish in a legislative
	amendment exercise.
	Members supported the proposals to amend the Ordinance. We are proceeding with
	the legislative amendment exercise which aims to introduce a number of
	improvements to the Public Health (Animals and Birds) Ordinance, including the
	extension of the ambit of the Ordinance to cover fish.
2. Legislative amendment to	With the coming into force of the Public Health (Animals and Birds) (Chemical
separate control of drugs for humans	Residues) Regulation, the problem of abuse of drugs in husbandry practice is being
and animals in order that drugs for	effectively tackled. EFB as the policy bureau and AFCD as the enforcement
food animals could be regulated	department will keep the Regulation under constant review to ensure that no abuse of
under one ordinance (Cap. 139) and	chemicals, antibiotics and drugs on food animals goes unregulated.
one department (The Agriculture,	The problem of abuse of drugs in husbandry practice is a different matter from the
Fisheries and Conservation	registration of drugs, the mechanism of which is provided for in the Pharmacy and
Department)	Poisons Ordinance. Under this Ordinance, all pharmaceutical products, including
,	those used on animals, have to be registered with the Pharmacy and Poisons
	(Registration of Pharmaceutical Products and Substances: Certification of Clinical

	Trial/Medicinal Test) Committee of the Pharmacy and Poisons Board. One of the members of this committee is a representative of the veterinary profession who is able to provide professional input in the Committee's consideration of applications for registration of veterinary drugs and related matters. The registration system is working well and we do not see a need for a separate registration mechanism for veterinary drugs under the Public Health (Animals and Birds) Ordinance.
3. Establishment of a designated	Concentrating all food animal farming in one designated zone is undesirable as
zone for food animal farming	animal disease would easily spread, resulting in complete loss of all Hong Kong's
_	livestock. Moreover, there is no suitable site in Hong Kong that can be converted to a centralized farming estate. The Administration will not pursue this proposal.
