

Legislative Council Panel on Commerce and Industry
The Applied Research Fund

INTRODUCTION

This information paper provides an update on the financial position of the Applied Research Fund (ARF) for the period of 1 June 2003 to 31 August 2003.

BACKGROUND

2. The ARF is a government owned venture capital fund of \$750 million set up in 1993 to provide funding support to technology ventures and research and development projects that have commercial potential. The longer term aim is to increase the technology capability and to enhance the competitiveness of local industry, thereby promoting high value added economic development in Hong Kong. The ARF is controlled and administered by the Applied Research Council (ARC), a company wholly owned by the Government and formed specifically for this role.

3. As we started to engage private sector venture capital firms to be the ARF's fund managers in November 1998, the investments of the ARC fall into two categories: those which were processed by the then Industry Department (ID) and funded before the appointment of private sector fund managers, and those which were identified by fund managers and funded after the appointment of fund managers.

4. We briefed Members on the application and management of the ARF at the Panel meeting on 11 December 2000¹, and undertook to provide quarterly written reports on the progress of the ARF. This paper provides another update since the one submitted in June 2003 and is the tenth quarterly report since then². Earlier on in February 2003, the Administration also briefed Members on the review of the role and future of the ARF.³

³ Panel paper CB(1)844/02-03(04) discussed by the Panel on 10 February 2003 refers.

LATEST DEVELOPMENT

I. Projects processed by the then ID

5. The ARC has approved 27 projects in this category with a total amount of \$97 million. We have reported in the last update that among these 27 projects, we have exited from 20 projects in the forms of loans fully repaid (7 cases), loans written off (8 cases), equities sold at net asset value (1 case), equities sold at nominal value (3 cases) and company dissolved (1 case). As a result, we have written off a total of some \$30.75 million or 31.7% of the total approved amount.

6. Among the remaining seven projects, we have provided support in the form of equity injection for one case and in the form of loans for the other six cases. Details on the progress of these seven cases are reported in paragraphs 7 to 9 below.

Equity Cases

7. During this reporting period, we are still holding shares in one company.

Loan Cases

8. Among the six loan cases, the company of a loan case has fully repaid the loan during this reporting period. The companies of another two cases were repaying the loan. The company of another one case has indicated difficulties in repaying the loan in accordance with the repayment schedule. We have been discussing with the company on how to resolve the matter.

9. We have taken legal actions for the remaining two cases and among which, we obtained favourable court ruling in one case. We were continuing with the appropriate course of enforcement actions and negotiation on settlement offers. The legal proceedings of the remaining case were still on-going.

II. Projects funded through fund managers

10. Since the last update, the ARC did not make any new or follow-on investment. However, one investment approved by the ARC back in April 2003 has been withdrawn. As of end August 2003, the ARF has supported a total of 23

projects through fund managers with approved funding of \$382 million. Details of the 17 active investments⁴ are at **Annex A**. The sectoral distribution of these funded projects is at **Annex B**.

11. The latest valuation as at 30 June 2003 of all the investments managed by our fund managers⁵ stood at 54% of the total investments at cost⁶. The main reason for the below cost valuation remains to be that our fund managers have continued to be prudent in the valuation in view of the financial difficulties confronting some investee companies and the general unfavourable investment climate for technology businesses.

ADVICE SOUGHT

12. Members are invited to note this paper.

Commerce, Industry and Technology Bureau September 2003

⁴ We reported in the paper of December 2000 (Ref: LC Paper No. CB(1)276/00-01(02)) that two investments had been written off, in the update of January 2002 (Ref: LC Paper No. CB(1)939/01-02) that one investee company had been wound up, in the update of June 2002 (Ref: LC Paper No. CB(1)2185/01-02) that one investee company was in the process of liquidation, in the update of October 2002 (Ref: LC Paper No. CB(1)24/02-03) that one investee company was in the process of liquidation, and in the update of June 2003 (Ref: LC Paper No. CB(1)2008/02-03) that the shares in another investee company were sold at nominal value. This means a loss of a total of \$75.39 million or 19.7% of the approved funding. Hence, a total of 17 investments are active.

⁵ We reported in the update of October 2002 (Ref: LC Paper No. CB(1)24/02-03) that the investments previously managed by AsiaTech Ventures Limited have been managed by the ARC directly since 3 May 2002.

⁶ The valuations of investee companies are provided by fund managers on the basis of the evaluation of individual investee company in its latest round of financing or as evaluated by the fund managers. If there is no additional round of financing after ARF's investment, our equity will be valued at our investment cost.

**List of Active Investments Approved by the Applied Research Council
after the Engagement of Fund Managers in November 1998
(Position as at end August 2003)**

Information Technology

Investee Company	Fund Manager	Technology Area	Funding Approved (HK\$m)
