

1. Response to the requested by the Select Committee to provide information on whether the third index patient had fever when admitted to ward 12A on 24 March 2003.

The third index patient who was 69 years old lady with diagnosis of Ca lung and chest infection. I can only provide the information about body temperature of the above lady from the report "Investigation on 12A outbreak in U.C.H." that she was fever (38.1) at AED on admission. If the committee prefers more detail information, please inquires the Hospital Chief Executive or Chief Of Service of Medical department of U.C.H. It is because I cannot obtain further information about patients for I have already left from Hospital Authority according to the Voluntary Early Retirement Scheme.

2. The corrections of draft verbatim transcript.

- 2.1. 第三頁(p.3)第二行供詞, ".....還有的是較為反覆一點....."應更正為 ".....還有的是較為煩複一點....."。
- 2.2. 第四十三頁(p.43)第五行供詞, ".....我自己即是 workman 一個....."應更正為 ".....我自己即是 ward manager(W.M.) 一個....."。
- 2.3. 第四十三頁(p.43)第九行供詞, ".....當時有 1 個就是香美, 就是 HCA, ....."應更正為 ".....當時有 1 個就是香美, 就是 GCA, ....."。
