

**CONFIDENTIAL**專責委員會(2)文件編號 : W2(C)SC2 Paper No. : W2(C)**Witness Statement****Re: CB2/SC2**

Mr. <sup>AA</sup> [REDACTED] was a 64 male who attended our Emergency department on 22/2/2003 and presented with fever and shortness of breath for four days. He had recent history of chest infection and was treated with antibiotic in China. He claimed that he had fully recovered from the illness before coming to Hong Kong. Besides fever and shortness of breath, he also had dry cough and left side chest pain. On examination, his SaO2 on room air was 65% and which was improved to 95% after he was put on 100% via mask. Xrays of his chest was performed which showed bilateral ground glass appearance. He was transferred to Medical ICU for further management.

Declaration: This statement is true to the best of my knowledge and belief.
