Dear Mr. Kwok Wai Keung,

My name is Wu Sze Liang and I have been a smoker for over 30years.

I tried IQOS before which I know is called heat not burn tobacco. I think this is a very good product since it has no smell and no ash!

It does not give me any unpleasant smell when I get home.

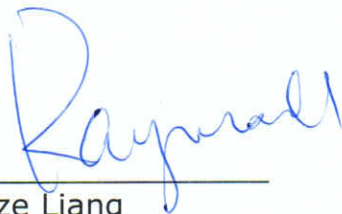

My wife also encourages me to use this product instead of cigarettes, which brings no smell at home.

I heard that the government is planning to ban this product in HK which I think does not make sense.

Banning a better tobacco product and allow the traditional cigarette still be used in HK?

I wonder why the government did not consult the public and I would like to express my personal opinion in the public hearing occasion.

Thank you for your attention.

Wu Sze Liang
